CableData® Collector Collection Software

Extended Captures Application Note

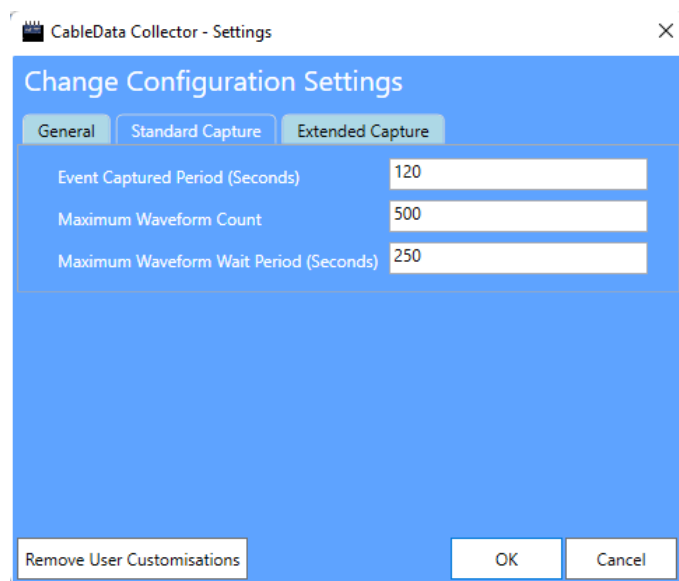

Background

When using the CableData® Collector Collection Software, we recommend configuring tests to perform Extended Captures to collect more samples.

Configuration Steps

1. Connect the CDC to your laptop.
2. Open the CDC Collection Software.
3. Click Settings in the bottom right corner.
4. Click the Standard Capture Tab.
5. Set "Event Captured Period (Seconds)" to 120.
6. Set "Maximum Waveform Count" to 500.
7. Set "Maximum Waveform Wait Period (Seconds)" to 250.
8. Click "OK" to save the settings.
