

Environmental Policy Statement

EA Technology recognises that managing environmental responsibilities is an integral part of its business. The company is committed to minimising the impact of its activities on the environment and to maintaining carbon neutrality.

In order to meet this commitment we will:

- Conform to relevant environmental legislation and other applicable requirements.
- Take practical measures to protect the environment, such as using natural resources more efficiently and, where reasonably practicable, making the best use of technologies to reduce carbon emissions.
- Off-set carbon emissions where they cannot be practically eliminated.
- Prevent pollution by striving to conserve resources, promoting re-use and recycling, minimising waste and reducing harmful emissions.
- Provide products and services that support our client's commitments to the environment.
- Ensure that all staff are made aware of their environmental responsibilities and are encouraged to participate in environmental improvement initiatives.
- Set objectives and targets to support these policy commitments and to ensure continual improvement in environmental performance.
- Periodically monitor and review our environmental performance and take corrective action where necessary.
